

Open Service Opportunities

Hôpital Evangélique « Le Pionnier »

June 2020

Our Mission

Hôpital Evangélique « Le Pionnier » in Impfondo, Congo-Brazzaville, is a 60-bed, non-denominational mission hospital that seeks to respond to people's physical and spiritual needs, built upon a Biblical foundation. The hospital operates in a challenging environment in which individuals can make a real impact.

Our primary goal and greatest vision is to *glorify God and love Him forever* by bringing people to Christ, and encouraging believers (including ourselves) to become more productive members of the body of Christ (John 15:8). As followers of Jesus Christ, our team members have been called individually by God to come to Congo to seek and save those who are lost (Luke 19:10).

We strive to provide an environment for effective Christian ministry, resulting in transformed lives and careers. The hospital has a number of open positions for committed Christians who feel led to serve in a front-line African mission field. Some of the opportunities to serve are described below...

Nurses, Physician Assistants, & Nurse Practitioners

Hardworking, adaptive individuals are sought for a range of functions including clinical care (medicine, surgery, pediatrics, and obstetrics), and nursing education. Qualified individuals need to take charge and show initiative, while developing a motivated care giving team. Nursing educators will be involved in the development of a curriculum for a nurse training program appropriate for the local African context. This is care giving as Florence Nightingale practiced it—an opportunity to use your medical training to make a real difference in individual lives and the fabric of a community.

Physicians

The hospital seeks committed doctors with a vision to serve where they are needed most, regardless of their specialty. The daily medical challenges confronted at the hospital allow doctors to have a life-saving impact on hundreds of patients per month. This is a sacrificial, selfless outreach to address both the physical and spiritual health of patients. Qualified applicants need to be adaptive and creative, and be energized by practicing in a front-line medical setting.

Pharmacist or Pharmacy Technician

The hospital's pharmacist position provides the opportunity to practice the full breadth of the profession. This includes ordering medicine, inventory management, fulfilling department orders and prescriptions, developing protocols, and providing training to other staff members and students. The hospital seeks a personable, adaptive, organized individual who has a heart for African missions.

Mechanics & Maintenance/Construction Professionals

If you have significant maintenance or mechanical experience, and communicate effectively, this post may be for you. The hospital seeks dedicated, committed, adaptable individuals able to invest 3 months or more working on vehicle, equipment and building maintenance, as well as construction projects. There are 35+ buildings on the hospital compound and a number of old vehicles and aging equipment, so these are certainly challenging full-time jobs which have a direct positive effect on the hospital's capacity for outreach and staff morale.
